

CAGRD FACT SHEET

What is the Central Arizona Groundwater Replenishment District?

CAGRD is a special function of Central Arizona Project, replenishing water to foster and enhance responsible groundwater management. It was created by the Arizona State Legislature in 1993 to facilitate the State's adoption of the assured water supply rules requiring new growth to demonstrate a 100-year assured water supply. CAGRD's members are Arizonans in Maricopa, Pima and Pinal counties without access to a renewable water supply. CAGRD serves its members by replenishing the groundwater they pump, providing a way to comply with Arizona's groundwater laws.

Since its inception, CAGRD has replenished more than 500,000 acre-feet of water on behalf of its members. One acre-foot equals 325,851 gallons.

CAGRD provides an effective mechanism for enrollees to comply with Arizona's groundwater management laws.

24 Arizona cities, towns and private water companies and more than 1,100 subdivisions in Maricopa, Pima and Pinal counties are members of CAGRD.

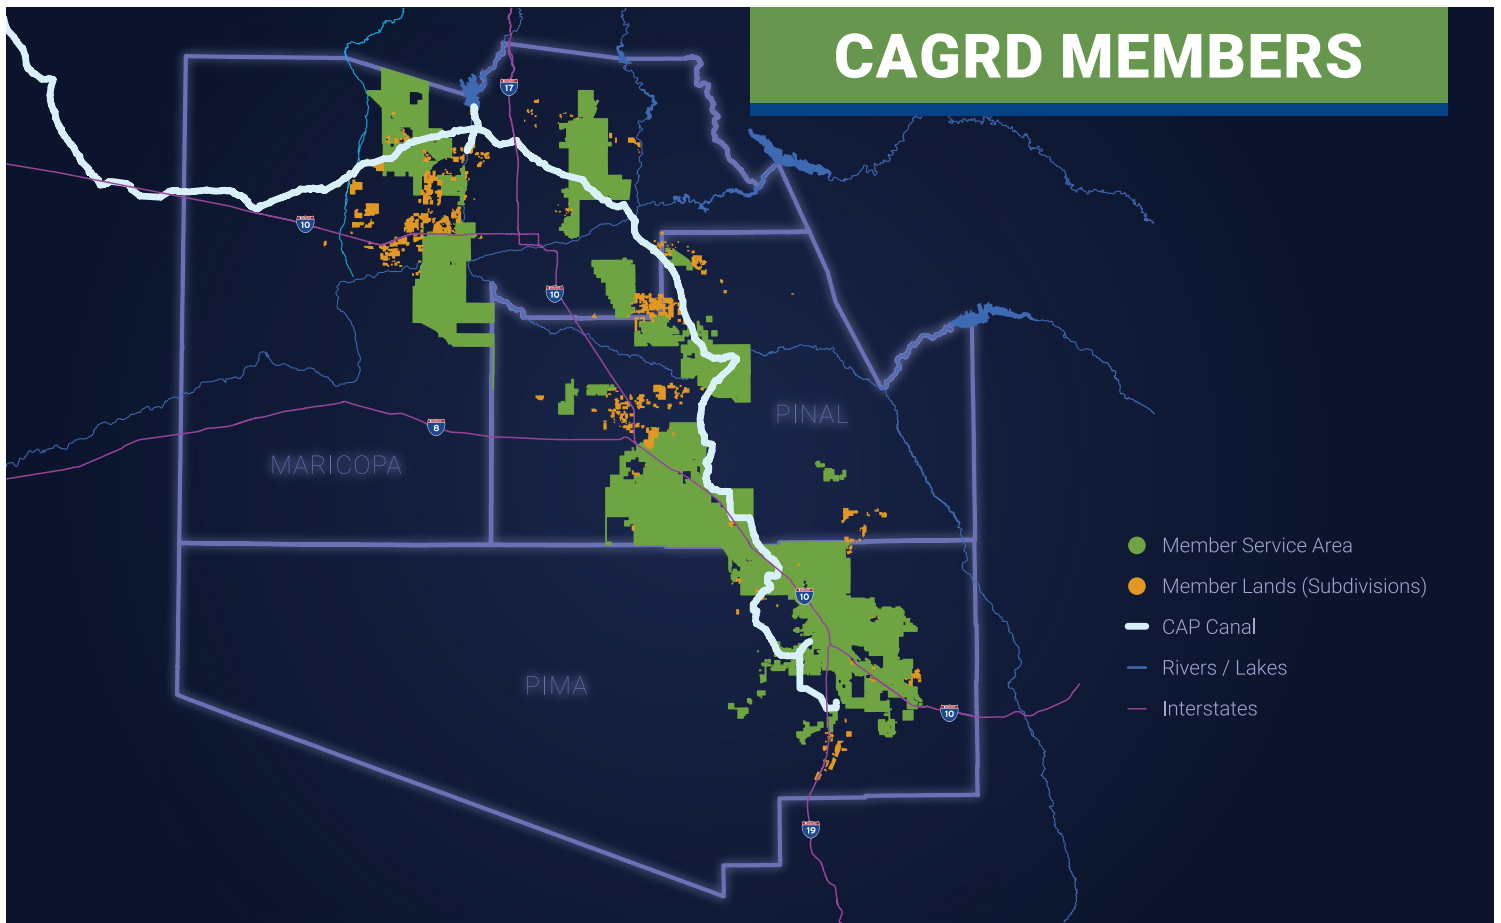

Economic development is possible through CAGRD's responsible water management.

CAGRD MEMBERS

WHO ARE THE MEMBERS OF CAGRD?

Any city, town, water company, subdivision or homeowner's association located in the Phoenix, Pinal or Tucson Active Management Area with access to a 100-year physical supply of groundwater may voluntarily join CAGRD so long as it meets the State's requirements.

THERE ARE TWO TYPES OF CAGRD MEMBERS:

1 Member Service Areas (MSAs): The service area of a city, town or private water company. Water providers who become Member Service Areas pay a replenishment assessment directly to CAGRD according to the amount of excess groundwater they deliver within their service areas during a year.

There are 24 CAGRD Member Service Areas – nine in the Phoenix AMA, four in the Pinal AMA and 11 in the Tucson AMA. Nearly 1 million Arizonans live in these service areas.

2 Member Lands (MLs): An individual subdivision or development. For Member Lands, an annual replenishment assessment is collected by the county treasurer from each individual parcel of land based on the amount of excess groundwater delivered to that parcel by its water provider.

There are more than 1,100 CAGRD Member Land subdivisions enrolled, representing 280,000+ homes served by approximately 60 water providers.
